

The following is a list of approved chemicals for use on Tech Global monitors for both the housing and the touch glass. We don't recommend using any chemicals not on the approved list.

Although these chemicals may be sprayed directly on the unit and the touch glass, Tech Global recommends spraying the cleaning chemical onto a cleaning cloth and then cleaning the unit and the touch glass.

Approved Cleaning Chemicals:

- Isopropyl
- Sani-Cloth
- CaviWipes (or similar)
- Clorox Disinfecting Wipes
- Windex (or similar)

Chemicals that will cause damage:

- Nitric Acid
- Turpentine
- Toluene
- Bleach (Sodium Hypochlorite, NaOCl)
- Hydrogen peroxide
- Ammonia

NEVER use abrasive cloths, paper towels, or tissue paper, which can scratch the touchscreen.
